

QUALITY AUDIT SERVICES

The term 'Quality Audit' covers a broad range of activities, from wholesale review of quality systems to technical reviews of tool-assembly procedures. At T H Hill, we have professionals qualified to perform audits at both ends of this spectrum, but we specialize in identifying and addressing issues at the vendor shop level. Whether DS-1®, internal procedure or other standard for operation, our auditor will compare actual practice to written documentation to measure supplier compliance as defined by your requirements. Over the past twenty-five years, we have performed audits in more than forty countries in every major oil & gas producing region of the world. By relying on our experience and technical expertise to provide actionable audit findings, you will have the information you need to drive quality improvement initiatives within your infrastructure.

CONTACT US

Contact us to learn more about our approach to quality audits for:

- Specialty Tool Providers
- Inspection Facilities
- Machine Shops
- Rental Tool Suppliers

We can also perform audits on manufacturers and other vendor types in your supply chain as dictated by your quality needs.

When Do I Need to Audit My Vendors?

When you...

- Have Infrastructure Concerns**
- Operate in Remote Locations**
- Experience Equipment Quality Issues**
- Have an Increase in Activity Levels**

Vendor audits can serve as first steps in evaluating unknown infrastructures, periodic reviews for quality management systems or detailed assessments of compliance with a given standard. Increases in drilling activity in a region place greater stress on the supply chain of which your vendors are a part, amplifying the need for quality control measures. If you are working in an unknown or underdeveloped infrastructure, have experienced previous problems with equipment quality or are witnessing an increase in activity in your drilling region, vendor audits can help you determine the severity of your quality issues. Additionally, audit results can serve as benchmarks to measure improvement as you implement quality improvement initiatives.

Why Should I Use T H Hill?

- Standards Expertise**
- Global Experience**
- Actionable Audit Findings**
- Total Quality Management**

Third-party vendor audits require exacting attention to procedures and processes, with a standardized approach to determining the correct procedures and processes. As the creators and authors of Standard DS-1®, we have demonstrated our leadership in defining the quality standards for drilling equipment, especially drill string components. Coupled with more than twenty-five years of field experience in every oil & gas exploration region of the world, our expertise in standards uniquely positions T H Hill as the premier provider of actionable audit findings. We approach your vendor audits as steps, not solutions, in a total quality management program, so you can rely on us to interpret your audit results, develop a quality plan and execute the plan effectively. Contact us to learn more about our approach to vendor audits and how they fit with your quality management initiatives.
